Dear colleagues!

IX all - Russian science Festival "Science 0+" – the largest popular science project in the field of science and technology, which has been held in Russia since 2006.

Organizer of all-Russian science Festival is organized by the Ministry of science and higher education of the Russian Federation with the support of the Ministry of education of the Russian Federation, Moscow state University named after M. V. Lomonosov, the Moscow city Government and Russian Academy of Sciences.

The science Festival is designed for the widest audience. The main idea is to popularize science in society, to attract attention to the activities of scientists and teachers, to increase interest in scientific achievements and research works, to involve young people in science, as well as to develop scientific creativity among schoolchildren and students.

The main theme of the science Festival 2019 is dedicated to the celebration of the International year of the Periodic table of chemical elements.

This year, the all-Russian science Festival continues to accept works for free international competitions aimed at the development of independent creative and research activities of young people. Competitions allow to identify talented young people who will be able to Express themselves in science and art.

To ensure maximum involvement of the target audience, we ask you to assist in informing schoolchildren, students, teachers and scientists about the competitions of the science Festival.

More information about the science Festival competitions can be found in the attached materials.

App: on 2 l. in 1 copy.

Deputy Director of the Department
state scientific and
science and technology policy

A.M. Romanov

**INTERNATIONAL COMPETITION
All-RUSSIAN FESTIVAL of SCIENCE "NAUKA 0+" 2019**

1. X international competition of scientific and technical works of high school students "Scientists of the future".

The purpose of the competition is to support gifted children, develop students' interest in the study of science, create conditions for the intellectual development of students.

Participants – high school students (grades 9-11).

The task of the contest participants is to implement and present their own scientific and engineering projects.

Nominations:

- physics;
- astronomy;
- mathematics;
- chemistry;
- biology and life sciences;
- programming;
- geology and earth sciences;
- engineering;
- wearable electronics, electronic gadgets, Internet of things, 3D modeling.

Key dates:

September 13, 2019 – acceptance of applications;

September 26, 2019 – announcement of semi-final results;

October 11-13, 2019 – holding of the final;

April-may, 2020 – holding of the super final.

The winners of the super final of the competition are part of the Russian team at the world scientific and technical review (International Science and Engineering Fair) in the United States.

The winners of the competition have the priority right to join the Russian national team at the Beijing science fair (Beijing Youth Science Creation Competition) and international young scientists' conference (International Conference of Young Scientists).

The final of the competition and awarding of the winners will be held at the site of the IX all-Russian festival of science in Moscow.
