

Catalysing Urban Transformation in Slovenia

City Catalyser Workshop
23 October 2019
Ljubljana

Invitation to join an introductory
City Catalyser Workshop with
EIT Climate-KIC, E-Zavod
and the Association of Urban
Municipalities of Slovenia

Climate-KIC is supported by the
EIT, a body of the European Union

EIT Climate-KIC is supporting Slovenia's efforts to demonstrate to the world how to achieve rapid transformation into inclusive, prosperous, circular and zero-carbon communities by 2030.

Slovenian cities will be critical to achieving this mission.

Which cities will lead the way?

Our City Catalyser workshops are designed to help you accelerate your impacts in making your community a better place — one that is healthy, prosperous, resilient, and sustainable.

WE ARE LOOKING FORWARD TO WORKING WITH YOU!

We invite a team of changemakers from your city community to join us in a series of exploratory workshops in 2019.

Together we must find a way to achieve the changes your community needs.

These workshops will be a collaborative co-design process. In an intensive 'incubator' environment we will help your team to:

- **Develop/refine** a 2030-mission, vision and commitment for your community
- **Strengthen** cross-community collaboration and implementation partnerships
- **Scope** projects and business models to deliver the changes your community needs
- **Build** capacity and skills to accelerate action
- **Attract** implementation funding and financing at the scale needed

The Process

City communities should send a **passionate, experienced, diverse team of changemakers** to join the introductory workshop.

We are looking for teams that can demonstrate a strong commitment to **creating transformative change** at speed; and an openness to working closely with EIT Climate-KIC on such a journey.

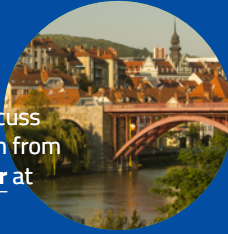

Teams should represent a range of community perspectives, such as: **municipalities, NGOs, businesses, research and individuals.**

After the introductory workshop, your team will have the chance to apply to participate in a more comprehensive **3-day City Catalyser session** in early December 2019.

The primary working language for these **sessions will be English.**

Interested?

To express your interest and discuss the possible participation of a team from your city, please contact **Tim Taylor** at tim.taylor@climate-kic.org

EIT Climate-KIC is a pan-European Knowledge and Innovation Community working to accelerate transformations of places through systems innovation. Our mission is to catalyse systemic change towards prosperous, inclusive, climate resilient societies with circular, net-zero emissions economies.

We are collaborating with the Slovenian government on a national demonstration of rapid change to a circular, regenerative and low-carbon economy and society in Slovenia - focused on three pillars: smart and circular communities, circular green development and circular policy design & science. We have early urban transformation collaborations underway with the cities of Maribor and Ptuj. Several Slovenian cities have participated in our annual Climathon - a year-round programme, with a powerful solutions-hackathon at its core. — www.climate-kic.org

Združenje mestnih občin Slovenije

The Association of Urban Municipalities of Slovenia (AUMS; ZMOS – Združenje mestnih občin Slovenije) represents the 11 urban municipalities of Slovenia. These cities cover more than a third of the population and act as regional urban centres, with a high concentration of economic, social, governmental and other public services. — www.zmos.si

e-Zavod

The mission of the e-Zavod is to improve the citizen's quality of life closely linked with sustainable development. Therefore we are focusing on environmental protection, innovative economy, social welfare and moral values. — www.ezavod.si
