30. March 2022**

Slovenian-Dutch Forum »GREEN DEAL, ORANGE STYLE!«

Wednesday, 30.03. 2022, 11:00-15:00, Hybrid event

Organizer: Slovenian-Dutch Business Platform in cooperation with partners

Event venue: Tehnološki park 19, 1000 Ljubljana, Slovenia & On-Line

Moderator: Luka Šinkovec

The official language of the event is English, no translation will be provided.

Linear, circular. Young, old. Manual, digital. Slovene green, Dutch orange. The connection between all of these is the desire for more, to solve problems with modern solutions through cooperation, business and technology.

Great things usually begin with a quote, in this case a quote from one of our speakers on our last event, Mr. Bart Stegeman: "Slovenia can become the first circular economy in the world." However, the quote can easily be misunderstood for self-centeredness. Instead, what if we were to say Slovenia can become the pioneer country, a Petri dish for others. In collaboration with larger economies, to gather good case practices, learn, and quickly scale up circularity to large economies such as the Netherlands.

Close collaboration between Slovenia and the Netherlands will enable Slovenia to become the first fully circular small economy in the world in the near future, meanwhile providing the Netherlands with good case practices and the blueprint on how to become the first fully circular large economy.

Let us use the Slovenian explosiveness and the Dutch perseverance confirmed through the golden Olympic medals and translate them both to the economic field and breakthrough cooperation for victories in a fair green transition.

Agenda:

11:00 - 11:30 Entry speech:

- Mark Boris Andrijanič, Minister without portfolio responsible for digital transformation
- Dr. Slobodan Šešum, Director-General Directorate for Economic and Public Diplomacy
